**What is Parole LEADS 2.0?** Parole LEADS is an acronym for Parole Law Enforcement Automated Data System – a web-based computer application which provides local law enforcement agencies (LEAs) with photos and information about parolees supervised by the Division of Adult Parole Operations (DAPO) of the California Department of Corrections & Rehabilitation (CDCR). Accessible via the internet, LEAs can access parolee information and query for selected parolees on a statewide basis. Photos of parolees, including mugshots, scars, marks & tattoos are available, as well as a mapping tool is included.

The application is available to law enforcement 24 hours a day, seven days a week and provides several layers of security to ensure that only law enforcement individuals can log on and have access to the information.
